Lifestyle
ELEVATORS

We provide comprehensive vertical & trans movement solutions like elevators, combines perfect raw materials and intelligently researched smart - advanced technology. This ensures our commitment to offer highest safety standards, total reliability and quality.

- Meet customized design and requirement.
- Inspection at every production stage from design to erection.
- Sourcing raw material from reputed brands.
- Elevators Safety
- Customer's feedback.
- On time delivery.

- **Safety drive**
  When a car stops between due to mechanical malfunction, the car descends to the nearest floor below.

- **Automatic door open & close time adjustment**
  Door open and close times are automatically adjusted depending on whether the call is a hall call or a car call to increase the operating efficiency.

- **Micro leveling**
  An automatic two-way leveling device is provided to maintain the elevator car level with the landing, regardless of elevator load or direction of travel.

- **Automatic car light & fan turn-off**
  Car illumination and fan are turned off automatically in case there is no hall or car call, saving energy.

- **Emergency fire Service**
  The elevators will automatically return to the lobby or primary egress floor when fire detection devices (Supplied by others) are activated, allowing passengers to exit. The elevator will remain parked at that landing until the detection devices are deactivated or until the elevator is used by a fireman using the special fireman's service switch or key.

- **Voice Announcement**
  This system provides riding passengers with audio information about car operation such as direction of travel, landing floor, etc.

- **Automatic Rescue Device (ARD)**
  In case of power failure, when the building has no emergency power supply, the elevator is sent to the nearest floor by DC power of battery to prevent passengers being trapped in the car.

MONTENNORI GEARED MOTOR

Static load	:	2.200 kg
Capacity	:	408 kg 1:1
Reduction ratios	:	1/37 – 1/46
Oil capacity	:	1,7 l
Gearbox weight	:	80 kg
Motors	:	50 Hz
VVVF 4 poles	:	4 kW

MONTENNORI GEARLESS MOTOR

Static load	:	3.400 kg
Capacity	:	816 kg 2:1
Torque moment	:	385 Nm – S5 – 40% ED – 180 avv/h
Pulley	:	240 – 320 mm
Gearless weight	:	180 kg
Voltage	:	380 V
Encoder	:	ENDAT – SINCOS

BHARATH BIJILEE GEARLESS MOTOR

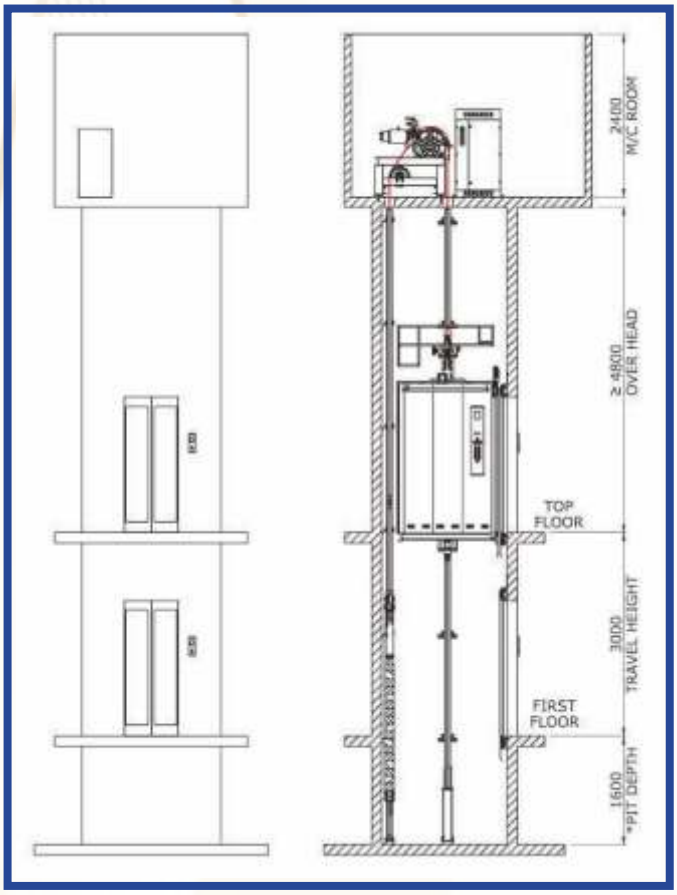

Phase	:	Single Phase
Voltage	:	110-380 V
Frequency	:	50-60 Hz
Type	:	Gearless
Power Source	:	Electric

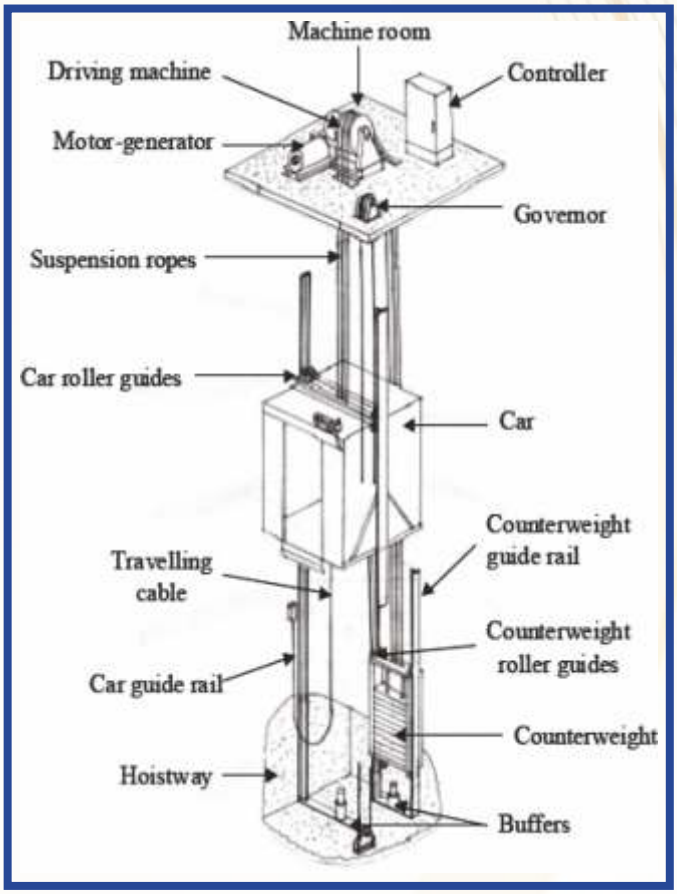

USHA MARTIN 13 mm WIRE ROPE
